CONTENTS TO VOLUME 18

PART 1 JANUARY 1964

Viscous and resistive eddies near a sharp corner. H. K. MOFFATT *page* 1

The stability of plane Poiseuille flow of a dusty gas. D. H. MICHAEL 19

The stability of elastico-viscous flow between rotating cylinders. Part 1. R. H. THOMAS and K. WALTERS 33

Resonant oscillations in closed tubes. W. CHESTER 44

A wake model for free-streamline flow theory. Part 2. Cavity flows past obstacles of arbitrary profile. T. YAO-TSU WU and D. P. WANG 65

Viscous flow through a grating or lattice of cylinders. JOSEPH B. KELLER 94

Correlation measurements in a non-frozen pattern of turbulence. M. J. FISHER and P. O. A. L. DAVIES 97

The drag of a compressible turbulent boundary layer on a smooth flat plate with and without heat transfer. D. B. SPALDING and S. W. CHI 117

Effect of finite boundaries on the Stokes resistance of an arbitrary particle. Part 2. Asymmetrical orientations. HOWARD BRENNER 144

REVIEWS

Dynamics of Satellites 159

PART 2 FEBRUARY 1964

Dual solutions of the Greenspan–Carrier equations. D. H. WILSON 161

Natural convection with discontinuous wall-temperature variations. JOSEPH A. SCHETZ and ROGER EICHHORN 167

The instability of a non-uniform vortex sheet. L. M. HOCKING 177

Free-surface oscillations in a slowly rotating liquid. JOHN W. MILES 187

The flow into an expanding spherical vortex. J. S. TURNER 195

Reverse-flow integral methods for second-order supersonic flow theory. JOSEPH H. CLARKE 209

Uniform second-order solution for supersonic flow over delta wing using reverse-flow integral method. JOSEPH H. CLARKE and JAMES WALLACE 225

The statistical dynamics of homogeneous turbulence. S. F. EDWARDS 239

The propagation of small disturbances in a radiating gas. WILBERT J. LICK 274

Experiments on jet flows and jet noise far-field spectra and directivity patterns. Erik Mollo-Christensen, Marc A. Kolpin and John R. Martuccelli *page* 285

Forces on a sphere accelerating in a viscous fluid. Fuat Odar and Wallis S. Hamilton 302

Image solution for vertical motion of a point source towards a free surface. John P. Moran 315

Part 3 March 1964

Evolution of the trans-Alfvénic normal shock in a gas of finite electrical conductivity. L. Todd 321

Dual solutions of the Greenspan–Carrier equations II. K. Stewartson and D. H. Wilson 337

On the behaviour of small disturbances in plane Couette flow. Part 2. The higher eigenvalues. A. P. Gallagher and A. McD. Mercer 350

The structure of the turbulent pressure field in boundary-layer flows. G. M. Corcos 353

An experimental investigation of asymptotic hypersonic flows. N. C. Freeman, R. F. Cash and D. Bedder 379

The flow induced by a disk oscillating in its own plane. D. J. Benney 385

A study of the sprays formed by impinging jets in laminar and turbulent flow. N. Dombrowski and P. C. Hooper 392

On the boundary conditions at an insulating wall for hydromagnetic waves in a cylindrical plasma. L. C. Woods 401

Natural convection in a horizontal circular cylinder. Sheldon Weinbaum 409

Transition phenomena in oscillating boundary-layer flows. J. A. Miller and A. A. Fejer 438

The amplification of a weak magnetic field by turbulent motion of a fluid of large conductivity. P. G. Saffman 449

On the deformation and drag of a falling viscous drop at low Reynolds number. T. D. Taylor and Andreas Acrivos 466

Reviews
